 - **Concepts:** RESTful APIs, CRUD Operations, Authentication & Authorization
-

PROJECTS

E-Commerce Web Application Self-based

Oct 2025 - Nov 2025

Tech Stack: React.js, Node.js, Express.js, MongoDB

- Built a full-stack e-commerce platform with authentication, cart, and product management.
- Developed RESTful APIs and handled backend logic using Node.js & Express.
- Designed a responsive UI using React.js and Tailwind CSS.

AI-Based Product Recommendation System Self-based

Nov 2025 - Dec 2025

Tech Stack: Node.js, MongoDB, Python, Pandas, Scikit-learn

- Built a recommendation system using collaborative filtering on user-product interaction data.
- Implemented cosine similarity to identify similar users and suggest products.
- Integrated a Python-based ML model with backend for dynamic recommendations.

Job Portal Web Application Self-based

Dec 2025 - Jan 2025

Tech Stack: React.js, Node.js, Express.js, MongoDB

- Developed a job portal with job search, posting, and application features.
 - Implemented user authentication and responsive UI for better user experience.
 - Designed RESTful APIs for managing job listings and user applications.
-
